RE: MOD007140874

Dear Mr. Morby:

This is to notify EPA that Talbot Industries of Neosho, Missouri no longer uses the same treatment process for which they were granted a federal exemption from generator status under 40 CFR Part 261.6 of RCRA for the treatment of spent pickle liquor. Talbot Industries currently filters the neutralized pickle liquor and proposes to landfill the resulting filtercake. The filtrate continues to be sent to the POTW.

I write this letter not knowing whether Talbot Industries has notified EPA of this process change. This has come to the attention of MDNR by Talbot Industries seeking approval to landfill the resulting filter cake sludge. It is MDNR's position that this specific waste be properly exempted/delisted before approval to landfill is given.

If you have questions concerning this matter, please contact Dan Mroz of the Waste Management Program at (314) 751-3241.

Sincerely,

Daniel L. Mroz  
Environmental Engineer
